

Aerodrome, Approach and Approach Radar Controller

Salary up to £49k

Gloucestershire Airport has a vacancy for an ADI/APP/APS rated ATCO.

Working at one of the UK's leading General Aviation Airports, you will be handling more than 85 000 runway movements and an additional 10 000 transits in a busy 'Class G' airspace environment.

With primary radar, ATM, touch-screen communications and modern ancillary equipment, you'll be integrating a mix of scheduled services, GA, training, corporate, commercial, and military traffic. This gives rise to a challenging and rewarding working environment.

Previous UK validations, OJT endorsement and experience are preferred; a Met. Observer's certificate would be advantageous. Consideration will be given to candidates without APS or APP endorsements.

If you'd like to like to join a small, friendly team, enjoy a generous holiday entitlement, contributory pension scheme, live in a great part of the country and not work night shifts, please send your CV to: -
